

Your local inventors

Contact your local Inventors' Association (from the list attached) to locate an inventor in your area that might be suitable and available to talk to your students.

These inventors are a useful resource and could:

- talk to your students about their inventions and answer questions related to the processes they went through to create their inventions or to protect their ideas;
- help judge inventions or designs of inventions that your students come up with; or
- provide input into advising students on their particular project.
